Contents of Volume 96

Number 1, 7 May 1982

EDITORIAL, Unsolved Problems 1

GARFINKEL, D., How Can We Effectively Handle the Large Information Content and Complexity of Biology? 3

FELSENSTEIN, J., How Can We Infer Geography and History from Gene Frequencies? 9

BURGESS, A. W., Prebiotic Evolution: Conformational Perspectives 21

YČAS, M., A Message from Triceratops? 39

MEREDITH, A., Devolution 49

ELSASSER, W. M., The Other Side of Molecular Biology . . 67

WASSERMANN, G. D., TIMA Part 1. TIMA as a Paradigm for the Evolution of Molecular Complementarities and Macromolecules 77

THOMPSON, R. W., Comments on Size Dispersion in Living Systems 87

BOTKIN, D. B., Can There Be a Theory of Global Ecology? . . 95

SMITH, R. J., On the Mechanical Reduction of Functional Morphology 99

Number 2, 21 May 1982

ORLOVE, M. J., A Systematic Bias Against Altruism Due to an Inevitable Hitchhiking Process in the Hymenoptera (A Sequel to the Elevator Effect) 107

PENNY, D., Towards a Basis for Classification: the Incompleteness of Distance Measures, Incompatibility Analysis and Phenetic Classification 129

CASPER, B. B. and CHARNOV, E. L., Sex Allocation in Heterostylous Plants 143

WHITTENBURG, S. L., The Effect of the Membrane Compression Wave on the Light Scattering Spectrum from a Protein Monomer–Dimer Equilibrium 151

HEJNOWICZ, Z., Vector and Scalar Fields in Modeling of Spatial Variations of Growth Rates within Plant Organs . . . 161

LARTER, R. and ORTOLEVA, P., A Study of Instability of Electrical Symmetry Breaking in Unicellular Systems 175

KORZUHIN, M. D. and KAGANOVA, O. Z., Genotype Dynamics in Populations with Breeding Pairs 201

HEINRICH, R., GAESTEL, M. and GLASER, R., The Electric Potential Profile Across the Erythrocyte Membrane 211

PONNUSWAMY, P. K. and ANUKANTH, A., Modified Nucleotides: Their Conformational Characteristics 233

AINSWORTH, S. and KINDERLERER, J., The Identification of Unbranched Enzyme Kinetic Mechanisms by Computer Analysis of Qualitative Information: Logic of the Method . . . 253

PARKER, G. A., Why Are There so Many Tiny Sperm? Sperm Competition and the Maintenance of Two Sexes . . . 281

CALVO, A., CRUZ, J. L., GUTIÉRREZ, C., GARCÍA-HERDUGO, G., GIMÉNEZ-MARTÍN, G. and LÓPEZ-SÁEZ, J. F., Analysis of Cell Cycle in Root Meristems 295

SY, W. N.-C. and HAN, P., Analysis of a Stochastic Model of Cell Survival 309

Number 3, 7 June 1982

VAN HELDEN, P. D., A Theoretical Consideration of the Lysine-rich Histones: H1 from a Mammal and an Echinoderm, H5 from Erythrocytes 327

WAGNER, G. P., The Logical Structure of Irreversible Systems Transformations: A Theorem Concerning Dollo's Law and Chaotic Movement 337

RICARD, J. and NOAT, G., Evolution of Regulatory Enzymes Towards Functional Simplicity 347

RIKMENSPOEL, R., Ciliary Contractile Model Applied to Sperm Flagellar Motion 617

HAMMERSTEIN, P. and PARKER, G. A., The Asymmetric War of Attrition 647

CORRSIN, S., A More Explicit Estimate for the "Implications of Athlete's Bradycardia on Lifespan" 683

GREGORIUS, H.-R., Selection in Plant Populations of Effectively Infinite Size. II. Protectedness of a Biallelic Polymorphism . 689

BONT, W. S., A Model for the Lymphocyte Production Pathway in Bone Marrow 707

NICHOL, L. W., SCULLEY, M. J. and WINZOR, D. J., The Composition-dependence of the Extent of Reaction between a Multivalent Acceptor and a Bivalent Ligand: Implications of Self-interaction of the Ligand in Precipitin Effects 723

PAPADOPULOS-ELEOPULOS, E., A Mitotic Theory 741

Index to Volume 96

Acceptor, multivalent, and a bivalent ligand, the composition-dependence of the extent of reaction between; implications of self-interaction of the ligand in precipitin effects, 723
Adenylate kinase reaction, informational aspects of Gibbs function output from nucleotide pools and of, 425
AINSWORTH, S. and KINDERLERER, J., The identification of unbranched enzyme kinetic mechanisms by computer analysis of qualitative information: logic of the method, 253
Altruism, a systematic bias against, due to an inevitable hitchhiking process in the Hymenoptera (a sequel to the elevator effect), 107
Alveolus, balloon model of; dynamics of viscoelastic spherical membranes, 517
ANUKANTH, A. (see PONNUSWAMY, P. K.), 233
Asymmetric war of attrition, 647
Athlete's bradycardia, a more explicit estimate for its implications on lifespan, 683
Attrition, the asymmetric war of, 647

Balloon model of the alveolus—dynamics of viscoelastic spherical membranes, 517
Biallelic polymorphism, protectedness of; selection in plant populations of effectively infinite size, 689
Biological similarity theory revisited, 543
Biology, how can we effectively handle the large information content and complexity of?, 3
Biomolecules, *ab-initio* refinement of an orbital-centred force field for; test cases including peptides, a sulphonamide and modelling of DNA helices, 381
Bone marrow, a model for the lymphocyte production pathway in, 707
BONT, W. S., A model for the lymphocyte production pathway in bone marrow, 707
BOTKIN, D. B., Can there be a theory of global ecology?, 95
Bradycardia, athlete's, a more explicit estimate for its implications on lifespan, 683
Breeding pairs, genotype dynamics in populations with, 201
BURGESS, A. W., Prebiotic evolution: conformational perspectives, 21

CALOW, P. (see SILBY, R.), 401
CALVO, A., CRUZ, J. L., GUTTIÉRREZ, C., GARCÍA-HERDUGO, G., GIMÉNEZ-MARTIN, G. and LÓPEZ-SÁEZ, J. F., Analysis of cell cycle in root meristems, 295
Carboxypeptidase A, *ab initio* molecular orbital study on the effects of zinc ion, its ligands and ionic amino acid residues for proton transfer energetics between Glu 270 and Zn co-ordinated water molecule in, 473
CASPER, B. B. and CHARNOV, E. L., Sex allocation in heterostylous plants, 143
Cell cycle in root meristems, analysis of, 295
Cell cycle, theory of distributed quiescent state in, 495
Cell survival, analysis of a stochastic model of, 309
Cellular senescence, a stochastic model of; concordance with experimental data, 443

Chaotic movement, a theorem concerning Dollo's Law and; the logical structure of irreversible systems transformations, 337
CHARNOV, E. L. (see CASPER, B. B.), 143
Ciliary contractile model applied to sperm flagellar motion, 617
CLARKE, C. H., Evolutionary implications of potential frameshift hot-spots, methylation sites, and codon usage differences between genes and between organisms in *Escherichia coli* and *Salmonella typhimurium*, 461
CLARKE, C. H. and MILLER, P. G. G., Consequences of frameshift mutations in the trp A, trp B and lac I genes of *Escherichia coli* and in *Salmonella typhimurium*, 367
Classification, towards a basis for; the incompleteness of distance measures, incompatibility analysis and phenetic classification, 129
Codon usage differences between genes and between organisms in *Escherichia coli* and *Salmonella typhimurium*, evolutionary implications of potential frameshift hot-spots, methylation sites, and, 461
Competition, sperm, and the maintenance of two sexes; why are so many tiny sperm?, 281
Complexity and large information content of biology, how can they be effectively handled?, 3
Computer analysis of qualitative information, the identification of unbranched enzyme kinetic mechanisms by; logic of the method, 253
Conformational characteristics of modified nucleotides, 233
Conformational perspectives of prebiotic evolution, 21
CORRSIN, S., A more explicit estimate for the "implications of athlete's bradycardia on lifespan", 683
CRUZ, J. L. (see CALVO, A.), 295

Devolution, 49
DIMITROV, D. S., GEORGIEV, G. A., STOICHEVA, N. G. and TRAYKOV, T. T., Dynamics of viscoelastic spherical membranes—the balloon model of the alveolus, 517
Distance measures, incompatibility analysis and phenetic classification, the incompleteness of; towards a basis for classification, 129
Distributed quiescent states in the cell cycle, theory of, 495
DNA helices, modelling, a test case in *ab-initio* refinement of an orbital-centred force field for biomolecules, 381
DNA information contents, significance in mutations and evolution, 571
Dollo's Law and chaotic movement, a theorem concerning; the logical structure of irreversible systems transformations, 337
Dynamics of viscoelastic spherical membranes—the balloon model of the alveolus, 517

Echinoderm, a theoretical consideration of the lysine-rich histone H1 from, 327
Ecology, global, can there be a theory of?, 95
EDITORIAL, 1
Electric potential profile across the erythrocyte membrane, 211
Electrical symmetry breaking in unicellular systems, a study of instability to, 175
Elevator effect, a sequel to; a systematic bias against altruism due to an inevitable hitchhiking process in the Hymenoptera, 107
ELSASSER, W. M., The other side of molecular biology, 67

Enzyme kinetic mechanisms, unbranched, identification by computer analysis of qualitative information; logic of the method, 253
Enzyme migration on linear polymers, 561
Enzymes, regulatory, evolution towards functional simplicity, 347
Erythrocyte membrane, the electric potential profile across, 211
Erythrocytes, a theoretical consideration of the lysine-rich histone H5 from, 327
Escherichia coli, consequences of frameshift mutations in the trp A, trp B and lac I genes, 367
Escherichia coli and *Salmonella typhimurium*, evolutionary implications of potential frameshift hot-spots, methylation sites, and codon usage differences between genes and between organisms in, 461
Evolution of molecular complementarities and macromolecules, TIMA as a paradigm for, 77
Evolution, prebiotic; conformational perspectives, 21
Evolution of regulatory enzymes towards functional simplicity, 347
Evolution, significance of the information contents of DNA in mutations and, 571
Evolutionary implications of potential frameshift hot-spots, methylation sites, and codon usage differences between genes and between organisms in *Escherichia coli* and *Salmonella typhimurium*, 461

FELSENSTEIN, J., How can we infer geography and history from gene frequencies?, 9
Flagellar motion of sperm, ciliary contractile model applied to, 617
Force field, orbital-centred, for biomolecules, *ab-initio* refinement of; test cases including peptides, a sulphonamide and modelling of DNA helices, 381
Frameshift mutations in the trp A, trp B and lac I genes of *Escherichia coli* and in *Salmonella typhimurium*, consequences of, 367
Frameshift hot-spots, methylation sites, and codon usage differences between genes and between organisms in *Escherichia coli* and *Salmonella typhimurium*, evolutionary implications of, 461
Functional morphology, on the mechanical reduction of, 99
Functional simplicity, evolution of regulatory enzymes towards, 347

GAESTEL, M. (see HEINRICH, R.), 211
GARCÍA-HERDUGO, G. (see CALVO, A.), 295
GARFINKEL, D., How can we effectively handle the large information content and complexity of biology?, 3
GEEVAN, C. P. (see RAO, J. S.), 571
Gene frequencies, how can we infer geography and history from?, 9
Genes, evolutionary implications of potential frameshift hot-spots, methylation sites, and codon usage differences between, in *Escherichia coli* and *Salmonella typhimurium*, 461
Genotype dynamics in populations with breeding pairs, 201
Geography and history, how can they be inferred from gene frequencies?, 9
GEORGIEV, G. A. (see DIMITROV, D. S.), 517
Gibbs function output from nucleotide pools, informational aspects of, 425
GIMÉNEZ-MARTÍN, G. (see CALVO, A.), 295
GLASER, R. (see HEINRICH, R.), 211
Global ecology, can there be a theory of?, 95

GREGORIUS, H.-R., Selection in plant populations of effectively infinite size. II. Protectedness of a biallelic polymorphism, 689
Growth process and interfacial process considered in connection with specific surface area (letter), 511
Growth rates within plant organs, vector and scalar fields in modeling of spatial variations of, 161
GÜNTHER, B. and MORGADO, E., Theory of biological similarity revisited, 543
